## Table of contents

1	Items included .....	2
2	Installation on the UDW .....	2
3	Performing the calibration test.....	3

## 1 Items included

- 1x A- calibration slide  
1x B- star knob screw  
1x C- bolt M6x16  
1x D- washer M6x30

## 2 Installation on the UDW

To install the calibration slide on the UDW, first attach the M6x16 bolt (**C**) together with the M6x30 washer (**D**) on the frame of the UDW.

### PLEASE NOTE!

Make sure that the hexagonal bolt is firmly seated.

Then hook the calibration slide (**A**) onto the bolt and fasten it onto the frame with the star knob screw (**B**).

Figure 1: Installation of the calibration slide on the frame

### 3 Performing the calibration test

To perform the calibration test, open the fasteners on the side of the plate kit and fold the spreader unit down (1).

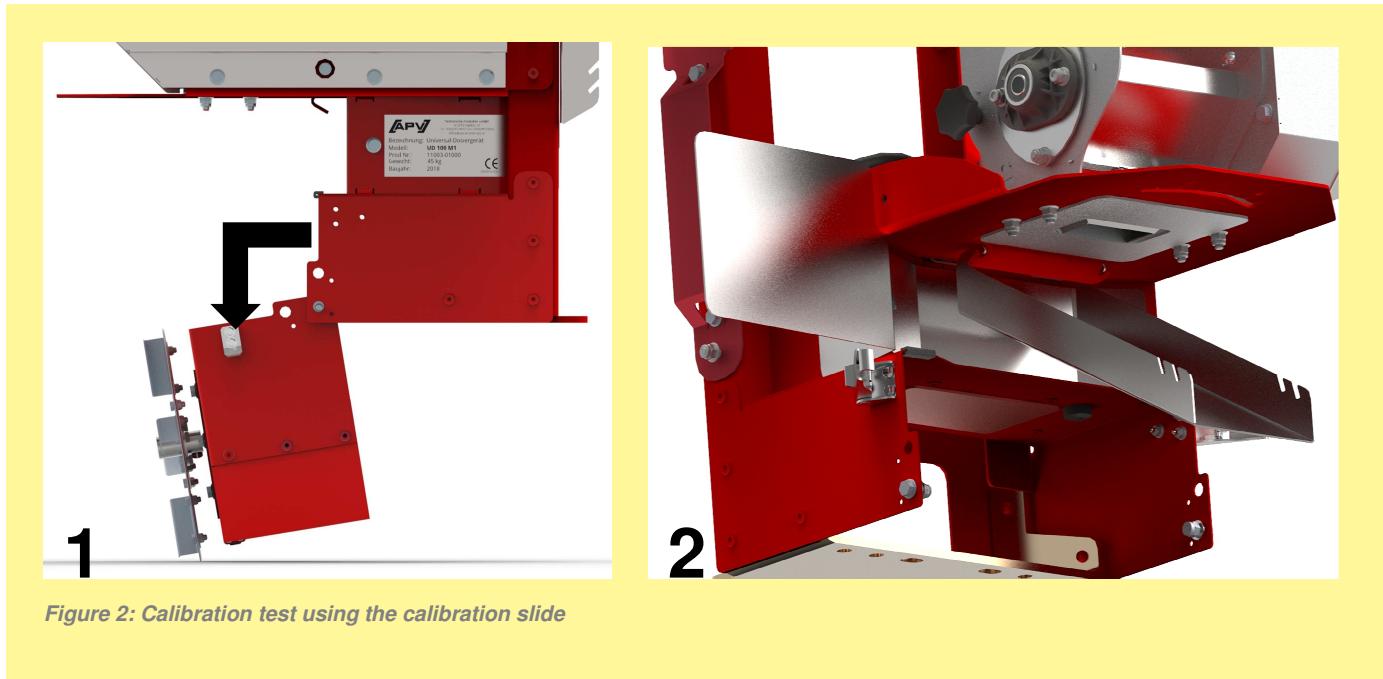

Then hook the calibration slide (**A**) onto the intended lugs under the metering unit.

Now perform the calibration test. You can find the instructions in your operating instructions (2).
